

Barun Tayenjam

Technical Lead · **Web Security & API Specialist** · **AI & AI-assisted engineering enthusiast** Imphal West, Manipur, India · [Email](#) [LinkedIn](#) · [GitHub](#) · [Portfolio](#)

PROFESSIONAL PROFILE

Technical Lead with 15+ years architecting scalable, secure web solutions. Solid foundation in WordPress, PHP, MySQL, JavaScript, and Node.js API development — now driving design and implementation of robust, secure applications at scale. Passionate about advancing web security and API best practices, mentoring teams on coding standards, and harnessing AI-assisted engineering to accelerate innovation.

Currently leading day-to-day development while empowering teams through mentorship on web security and coding best practices. Exploring the intersection of traditional coding expertise and AI-enhanced development to redefine how software is built and maintained.

SELECTED IMPACT

- **20+ hours/week reclaimed** across engineering teams through CI/CD automation and standardized GitOps workflows.
- **99.99% uptime maintained** on enterprise security systems serving high-traffic clients under peak load.
- **10+ junior developers mentored** to mid-level and senior promotions via structured code reviews and architecture guidance.
- **4 open-source dev tools shipped** and adopted across multiple teams, reducing daily friction in commits, triage, and CSS review.

CORE TECHNICAL SKILLS

- **Top Skills:** CSS, PHP, MySQL, JavaScript, AJAX
- **Languages:** JavaScript, TypeScript, Python, PHP, Bash, SQL
- **Web Stack:** Node.js, WordPress, React, REST APIs, GraphQL, Tailwind CSS
- **Cloud & DevOps:** Docker, Kubernetes, CI/CD (GitHub Actions, GitLab), GitOps, Linux, Nginx
- **AI Engineering:** LLM Integration (OpenAI, Groq, Ollama, Llama), AI-assisted engineering, Prompt Engineering, LLM Guardrails, Observability
- **Databases & Observability:** MySQL, PostgreSQL, Redis, Prometheus, Grafana
- **Leadership:** Architecture Design, Web Security, Incident Response, Secure Coding Training, Code Review, On-call Runbooks

EXPERIENCE

Technical Lead · Grazitti Interactive · Mar 2025 – Present - Guiding development teams to build scalable, secure, high-performance web solutions. - Overseeing development processes, managing projects, ensuring timely delivery of robust software. - Mentoring developers on best practices, web security, and API design to foster continuous growth. - Driving tech stack evolution — API development using Node.js and PHP, integrating AI-driven methodologies (AI-assisted engineering) to optimize workflows. - Implementing coding standards, security measures, and QA processes across systems.

Senior Software Engineer · Grazitti Interactive · Apr 2019 – Mar 2025 - Responsible for development of the SearchUnify Website and Docs site. - Contributed to the SearchUnify WordPress Connector. - Implemented CI/CD pipelines to streamline deployment cycles. - Performed rigorous development testing to maintain code quality. - Delivered enterprise client security systems at 99.99% uptime while sustaining high-frequency release cycles.

Software Engineer · Grazitti Interactive · Apr 2018 – Apr 2019 - Handled multiple web development projects as part of a dedicated team. - Explored modular approaches to WordPress development. - Contributed to Grazitti Blog and internal tooling.

Senior Web Developer · NetPyx · Aug 2013 – Apr 2018 - Gathered client requirements and implemented them as effective web applications. - Led development of enterprise-grade web projects (WordPress, PHP, MySQL, JavaScript). - Collaborated cross-functionally to deliver robust client solutions rooted in web security and API best practices.

Web Developer · Avis Technologies · Apr 2011 – Sep 2013 - Developed responsive web interfaces and client-side platforms using CSS, JavaScript, and AJAX. - Worked alongside team members while communicating directly with clients to shape and deliver successful web projects. - Built and integrated RESTful APIs for client applications.

PROJECTS (OPEN SOURCE)

- **gitops**: AI-powered commit automation tool (Groq/Ollama). Standardized commit hygiene across teams and reduced PR review friction.
- **JiraGrok**: Chrome extension for Jira ticket triage (Groq/Llama 3.3). Cuts context-switching for PMs and engineers.
- **StarkCSS**: AI-powered CSS linter and optimizer. Keeps bundles lean with less manual review overhead.
- **wordpress-matrix**: Docker-based WordPress dev environment. Enables zero-toil onboarding for new developers.

EDUCATION

- **MBA, Information Technology** · Lovely Professional University · 2017
- **BCA, First Division** · Punjab Technical University · 2014
- **B.Sc. Information Technology** · DAV College Jalandhar
